Schneider Electric Unveils Square D I-Line Combo Panelboard Featuring a Space-Saving Design to Meet Customer's Power Needs

PALATINE, Ill. – October 14, 2013 – Schneider Electric, a global specialist in energy management, is announcing the release of their Square D I-Line™ Combo Panelboard, designed to save time and space by combining an I-Line power distribution section and NQ or NF lighting sections into one panelboard. The product's simple, innovative design enables fast installation, reduced labor expenses and material costs, and a smaller footprint.

With over 100 years of experience and following the company's recent announcement around their [investment and commitment to product innovation](#), Schneider Electric continues to expand their market leading portfolio of power distribution solutions. The new I-Line Combo Panelboard product provides an innovative, space-saving, and customizable solution to address customer pain points, helping them to improve performance, reduce costs, and save space within facilities.

Key features and functionalities of the I-Line Combo Panelboard include:

- **Ease of Installation and Compatibility** – The I-Line Combo Panelboard is built to the same UL® Listed 67 standard as other Square D panelboards and provides a simple, quick installation due to the minimal amount of materials needed and the benefit of only having to install one panelboard
- **Reduced Footprint** - By combining a power panel with up to two lighting sections in one enclosure, the I-Line Combo Panelboard saves significant space in a facility, over traditional configurations

Product Brief

- **Simple to Retrofit** - The I-Line Combo Panelboard enclosures fit into the same footprint on sites where an existing Classic I-Line power panelboard resides, providing easy upgrades of electrical equipment
- **Flexible Circuit Breaker Configuration** - Due to the I-Line Combo Panelboard's ability to house I-Line molded case circuit breakers as well as cost effective miniature circuit breakers, it provides not only a more economical solution but an adaptable solution tailored to meet each customer's space and power needs.
- **Customizable** – The Single I-Line Combo Panelboard is available in 26 and 32 inch widths. The Duplex I-Line Combo Panelboard is available in 32 and 44 inch widths, with two hard-bussed sections or one hard-bussed section and mounting space for field-installable options. The I-Line power section mounts horizontally, and is available in 18, 22.5, or 31.5 inch mounting space configurations

This new solution builds on Schneider Electric's industry leading Classic I-Line Panelboard solution offering the same quality and familiar layout to ensure no time is lost during installation. The new product also offers the same I-Line breaker connections for fast and safe installation. Customers will find the new Panelboard is a space-saving solution for retail spaces, offices, and commercial buildings who are looking to maximize space within their facilities.

The I-Line Combo Panelboard will be featured in Schneider Electric's booth during NECA 2013 (Booth #416). The solution will be available for Building Information Modeling (BIM), offering a simple, easy-to-use tool for new building construction designs.
